

2009 JAMIS VENTURA SPORT

Sterling Silver

UPGRADES FROM 2008

New FSA Tempo crank

Ritchey threadless headset

FEATURES/BENEFITS

The Ventura frame features Size Specific Tubing (SST): smaller frames are constructed with smaller diameter tubing to retain resiliency and ride quality, while larger frames are constructed using larger diameter tubing to retain stiffness for larger riders

Ventura Sport's frame is a competition inspired sloping top tube design featuring lightweight 7005 aluminum tubing and ride-tuned rear stays with a replaceable derailleur hanger

The Jamis designed aluminum road fork features lightweight aluminum blades that handle precisely, with a chromoly steerer to assure strength and durability

A complete Shimano Sora/2200 16-speed drivetrain, including STI shifters, assures light, precise shifting throughout the entire gear range

Sport's wheelset features light-but-durable double-wall aluminum rims, smooth rolling Formula alloy hubs and stainless steel spokes trued precisely with even spoke tension to stay in true

FSA's compact chainring concept is revolutionary: a 34T inner chainring offers a 15% lower gear ratio than traditional 39T double ring'd road cranks, but the 50T outer loses only 6% off the top end compared to the 53T traditional outer. You get the hill climbing capability of a triple, yet weight less than a standard double

A sealed cartridge bottom bracket improves performance and reduces maintenance

Tektro's dual pivot brakes offer safe, secure braking and high quality forged alloy construction

Vittoria's Zaffiro 23c tires offer legendary, road-holding capability and superior ride quality

Our over-sized 31.8 bar & stem combination offers greater support & stiffness when sprinting out of the saddle

With 55mm of shim stack under the stem out of the box allowing for over 2" of stem height adjustability
